Dear Sirs:

Please do not take away our right to know what is in and or on our food. I feel as an American citizen I have the right to know what is done to the food I eat. I do my best to make sure my family eats the best food possible. I do not want to eat genetically engineered "stuff". All food that is that is altered in any way should be labeled as such and then let people (we consumers) choose from there.

Thank you for your time. Please remember the health of every person in this country is being affected by your decisions.

Sincerely,  
Margaret Little
